      - 1. Why the Respirator is Necessary
      - 2. What are the Limitations of the Respirator
      - 3. How to Inspect the Respirator
      - 4. Procedures for Cleaning and Storage
  - IV. Learning Exercise**
  - V. Question and Answer Session**

The on-site respirator training, if conducted in conjunction with the fit tests, is \$115.00, and will take approximately 40 minutes to complete. To conduct the respiratory protection training without fit testing, the investment for the class is \$315.00. We perform qualitative fit testing on-site using irritant smoke. It takes about 15 minutes per test to complete and is \$27.00 per test.

Of course, *World Class Safety* offers a full line of respirators, cartridges, and accessories to assist you in being OSHA compliant.
